Contents

Introduction	4	ALGEBRA	
NUMBER AND PLACE VALUE		Algebra	31
Place value	6	Using formulae	32
Roman numerals	7	Solving equations	33
NUMBER – ADDITION, SUBTRACTION, MULTIPLICATION AND DIVISION		Linear number sequences	34
Addition and subtraction	8	MEASUREMENT	
Squares and cubes	9	Measures	35
Common multiples	10	Converting metric units	36
Common factors	11	Metric units and imperial measures	37
Prime numbers and prime factors	12	Perimeter and area	38
Multiplying and dividing by 10, 100 and 1,000	13	Area of parallelograms and triangles	40
Long multiplication	14	Volume	42
Long division	15	GEOMETRY – PROPERTIES OF SHAPES	
Correspondence	16	Angles and degrees	44
Order of operations	17	Circles	45
NUMBER – FRACTIONS, DECIMALS AND PERCENTAGES		GEOMETRY – POSITION AND DIRECTION	
Ordering fractions	18	Coordinates	46
Adding and subtracting fractions	19	Translations	48
Multiplying fractions	20	Reflections	50
Dividing fractions	21	STATISTICS	
Changing fractions to decimals	22	Tables	52
Rounding decimals	23	Timetables	53
Adding and subtracting decimals	24	Pictograms	54
Multiplying decimals	25	Bar charts	55
Percentages	26	Pie charts	56
RATIO AND PROPORTION		Line graphs	57
Ratio	27	Averages	58
Proportion	28		
Scaling problems	29		
Unequal sharing	30		

The answers can be found in a pull-out section in the middle of this book.

Welcome to Achieve Mathematics: The Higher Score – Question Workbook

In this book you will find lots of practice and information to help you achieve the higher score in the Key Stage 2 Mathematics tests. You will look again at some of the same key knowledge that was in Achieve Mathematics: The Expected Standard – Question Workbook, but you will use it to tackle trickier questions and apply it in more complex ways.

About the Key Stage 2 Mathematics National Tests

The tests will take place in the summer term in Year 6. They will be done in your school and will be marked by examiners – not by your teacher.

There are three papers to the tests:

Paper 1: Arithmetic – 30 minutes (40 marks)

- These questions assess confidence with a range of mathematical operations.
- Most questions are worth 1 mark. However, 2 marks will be available for long multiplication and long division questions.
- It is important to show your working – this may gain you a mark in questions worth 2 marks, even if you get the answer wrong.

Papers 2 and 3: Reasoning – 40 minutes (35 marks) per paper

- These questions test mathematical fluency, solving mathematical problems and mathematical reasoning.
- Most questions are worth 1 or 2 marks. However, there may be one question with 3 marks.
- There will be a mixture of question types, including multiple-choice, true/false or yes/no questions, matching questions, short responses such as completing a chart or table or drawing a shape, or longer responses where you need to explain your answer.
- In questions that have a method box it is important to show your method – this may gain you a mark, even if you get the answer wrong.

You will be allowed to use: a pencil/black pen, an eraser, a ruler, an angle measurer/protractor and a mirror. You are **not allowed** to use a calculator in any of the test papers.

Test techniques

- Before the tests**
- Try to revise little and often, rather than in long sessions.
 - Choose a time of day when you are not tired or hungry.
 - Choose somewhere quiet so you can focus.
 - Revise with a friend. You can encourage and learn from each other.
 - Read the 'Top tips' throughout this book to remind you of important points in answering test questions.

- During the tests**
- READ THE QUESTION AND READ IT AGAIN.
 - If you find a question difficult to answer, move on; you can always come back to it later.
 - Always answer a multiple-choice question. If you really can't work out an answer, try to think of the most sensible response and read the question again.
 - Check to see how many marks a question is worth. Have you written enough to 'earn' those marks in your answer?
 - Read the question again after you have answered it. Make sure you have given the correct number of answers within a question, e.g. if there are two boxes for two missing numbers.
 - If you have any time left at the end, go back to the questions you have missed.

Where to get help:

- **Pages 6–7** practise number and place value.
- **Pages 8–17** practise number – addition, subtraction, multiplication and division.
- **Pages 18–26** practise number – fractions, decimals and percentages.
- **Pages 27–30** practise ratio and proportion.
- **Pages 31–34** practise algebra.
- **Pages 35–43** practise measurement.
- **Pages 44–45** practise geometry – properties of shapes.
- **Pages 46–51** practise geometry – position and direction.
- **Pages 52–58** practise statistics.

The answers can be found in a pull-out section in the middle of this book.

Place value

To achieve the higher score, you need to:
 ★ know the **place value** of numbers up to 10,000,000 with up to three decimal places.

1 Write the value of the digit **6** in these numbers.

4,264,000 505.362 0.576

1
(1 mark)

2 Circle the **two** numbers that sum to 8,500,000

2,132,000 700,000 1,500,000 6,368,000 2,232,000

2
(1 mark)

3 Tick (✓) the statement that is **not** true.

Tick **one**.

The digit **8** in 483,723 has the value **80,000**

The digit **1** in 2,107,225 has the value **ten thousand**.

The digit **9** in 789,888 has the value **9,000**

The digit **4** in 2.354 has the value **four thousandths**.

3
(1 mark)

4 3 0 4 1 5

Use four of these cards to make a four-digit **multiple of 10** that is **less than 3,000**

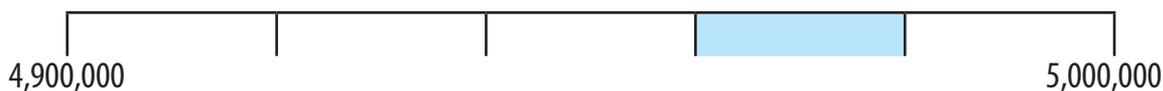

Find two different ways to do this.

and

4
(1 mark)

5 Write the **third odd number** that can be placed on the shaded part of this number line.

5
(1 mark)

Top tip

- Work out the scale on the number line first and label any points you know.

/5

Total for this page

Addition and subtraction

To achieve the higher score, you need to:

- ★ solve multi-step addition and subtraction problems, deciding which operations and methods to use and why.

1 Complete this sequence.

2,325 4,793 7,261

1
(1 mark)

2 $23,782 + \text{[]} = 41,509 - 13,256$

2
(1 mark)

3 Fill in the missing digits.

$$\begin{array}{r} 5 \ 7 \ 2 \ \square \ 3 \\ - \ 2 \ \square \ 7 \ 4 \ \square \\ \hline 3 \ 3 \ 5 \ 2 \ 9 \end{array}$$

3
(1 mark)

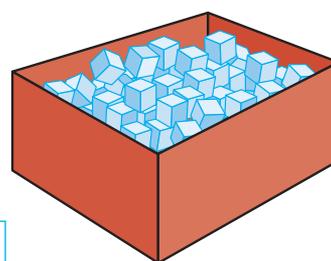

4 A small swimming pool holds 162,000 litres of water.
The pool will be filled over three days.

4
(1 mark)

Complete the table.

Day 1	Day 2	Day 3
59,865 litres	59,865 litres	litres

5 a) Ben has a box of **150** cubes.
He uses some of the cubes to build a tower.
98 cubes are left over.

How many cubes has he used?

5a
(1 mark)

b) Seb has **98** cubes left over.
He builds two more towers.

One tower uses **23** cubes and the other uses **19** cubes.

How many of his **98** cubes has he got left now?

5b
(2 marks)

Top tip

- Remember to line up digits with the same value when using the column method.

/7

Total for this page

Ordering fractions

To achieve the higher score, you need to:

★ compare and order **fractions**, including fractions greater than 1.

1 Write the symbol $<$, $>$ or $=$ to make these statements **true**.

$1\frac{5}{8} \square 1\frac{4}{7}$

$\frac{6}{9} \square \frac{2}{3}$

$2\frac{9}{10} \square 2\frac{5}{6}$

1
(2 marks)

2 A triangle is $\frac{7}{12}$ of the area of a rectangular flag.

A circle is $\frac{5}{9}$ of the area of another rectangular flag of the same size.

Which shape covers the greatest area? Tick (✓) your answer.

triangle circle

2
(1 mark)

3 Order these cards starting with the **smallest** fraction.

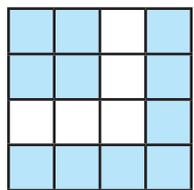

$\frac{7}{8}$	$\frac{5}{12}$	$1\frac{1}{2}$	$\frac{3}{4}$	$\frac{4}{5}$
<input type="text"/>				

smallest

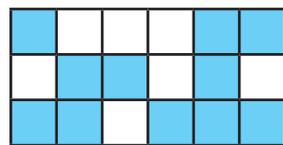

largest

3
(1 mark)

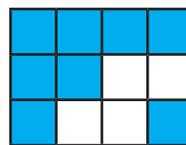

4 The shaded areas represent fractions of each shape.

A

B

C

Write the letters in order starting with the **largest** fraction.

largest

smallest

4
(1 mark)

Top tip

- Use equivalent fractions to make denominators equal.

/5

Total for this page

Ratio

To achieve the higher score, you need to:

- ★ solve **ratio** problems where missing values can be found by using multiplication and division facts.

1 In a fruit salad, 12 strawberries are used for every 5 peaches. Flora uses 85 of these fruits altogether to make a large fruit salad. How many strawberries does she use?

1
(1 mark)

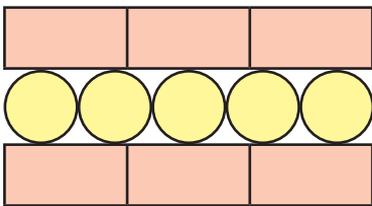

2 Jo draws a square with a base of 4.5 cm. She then scales the base by a whole number to draw a larger square. Circle the base lengths that she **cannot** make.
27 cm 45 cm 54 cm 84 cm 90 cm

2
(1 mark)

3 The ratio of fish to frogs in a small pond is 5:2. There are 14 frogs. How many fish and frogs are there in total?

3
(1 mark)

4 The picture shows one part of a repeating pattern of rectangular and circular tiles.

4
(2 marks)

Complete the table using the same ratio as shown in the picture.

Rectangular tiles	18		66	120	
Circular tiles		45			150

Top tip

- Ratio describes how something is divided and tells you the relative sizes of the shares.

/5

Algebra

To achieve the higher score, you need to:

★ express missing number problems using **algebra**.

1 Henry thinks of a number and divides it by 4

He then adds 5

Circle the algebraic rule that Henry has used.

$4n + 5$ $(4 \div n) + 5$ $(n \div 4) + 5$ $\frac{n}{5} + 4$

2 Use the algebraic rule $4n - 3$ to fill in the missing boxes.

Value of n Answer

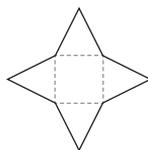

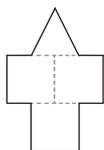

16

81

4.2

3 The large shapes are made up using these smaller squares and triangles. a b

Describe each shape algebraically using a and b .

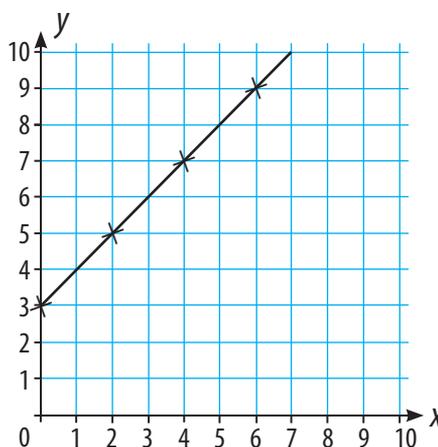

a) _____ b) _____

4 Kiki uses an algebraic rule to plot these coordinates.

Complete her rule.

$y =$ _____

1

(1 mark)

2

(1 mark)

3a

(1 mark)

3b

(1 mark)

4

(1 mark)

Top tip

- Remember to check your answers using the inverse operation.

Measures

To achieve the higher score, you need to:

- ★ solve problems involving the calculation and conversion of units of measure, using up to three **decimal places**.

1 A 25 kg sack of flour is divided into smaller bags of 525 g.

a) How many small bags of flour can be made?

b) What is the mass of flour left in the sack? kg

2 Kate has an equal number of coins in three bags.

She exchanges them at the bank for **two** notes.

Circle the number of coins that could be in each bag.

10 15 20 25 40

3 Toby uses these bricks to build a wall. A space of 0.8 cm is needed between bricks for cement.

230 mm

The wall is 21 bricks long.

Calculate the actual length of the wall. m

4 A swimming pool is filled with water at a rate of 26.485 litres every 210 seconds.

Calculate the amount of water that goes into the pool in 14 minutes.

litres

1a
(1 mark)

1b
(1 mark)

2
(1 mark)

3
(2 marks)

4
(2 marks)

Top tip

- Remember to check the units of measurement each time and convert any that are not the same.

Angles and degrees

To achieve the higher score, you need to:

- ★ recognise **angles** and find missing angles where they meet at a point or are on a straight line or are vertically opposite
- ★ find unknown angles in any triangle, quadrilateral or **regular polygon**.

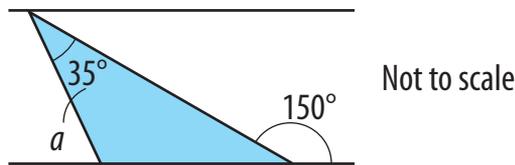

1 Five angles of an **equal** size meet at a point.

What is the size of each angle? °

1
(1 mark)

2 Calculate the value of angle a .

$a =$ °

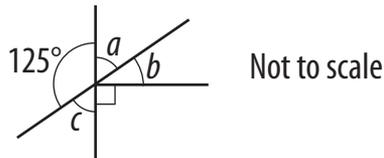

2
(1 mark)

3 Calculate angles a , b and c .

$a =$ °

$b =$ °

$c =$ °

3
(1 mark)

4 Angles in a pentagon sum to 540° .

What is the size of **each** angle in a regular pentagon? °

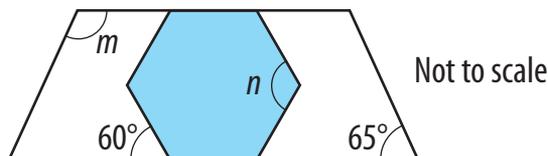

4
(2 marks)

5 A regular hexagon is drawn inside a regular trapezium.

Calculate the size of the angles m and n .

$m =$ °

$n =$ °

5
(2 marks)

Top tip

- Identify any angles that are of equal size.

/7

Total for this page

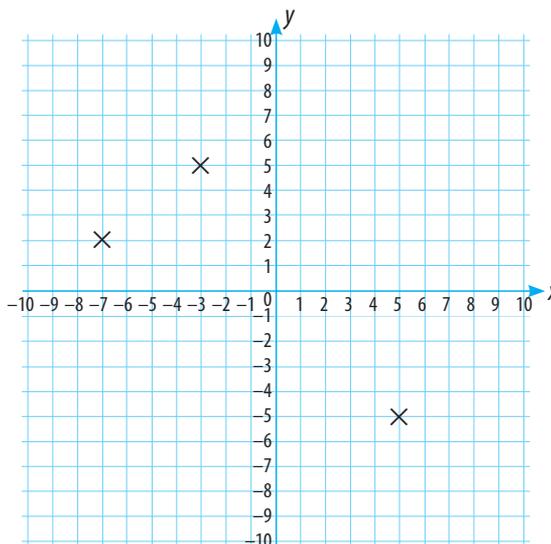

Coordinates

To achieve the higher score, you need to:

- ★ describe positions in all four quadrants on a 2-D coordinate grid
- ★ plot specified points and draw sides to complete a given polygon.

1 Write the coordinates of the missing vertex needed to complete the rectangle.

(,)

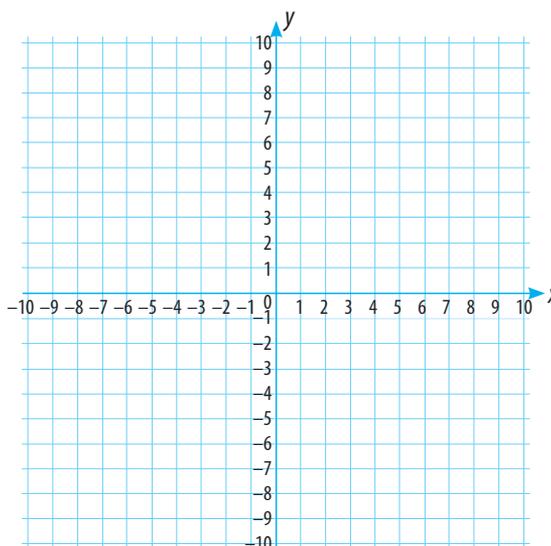

1
(1 mark)

2 a) Plot these coordinates on the grid.

(1,6) (7,1) (-5,1) (1,-9)

b) Name the shape that has been made.

2a
(1 mark)

2b
(1 mark)

3 Ruby plots a coordinate at (0,0).

Circle any coordinates Ruby could use to plot the diagonally opposite vertex of a square. The sides of the square should be horizontal and vertical.

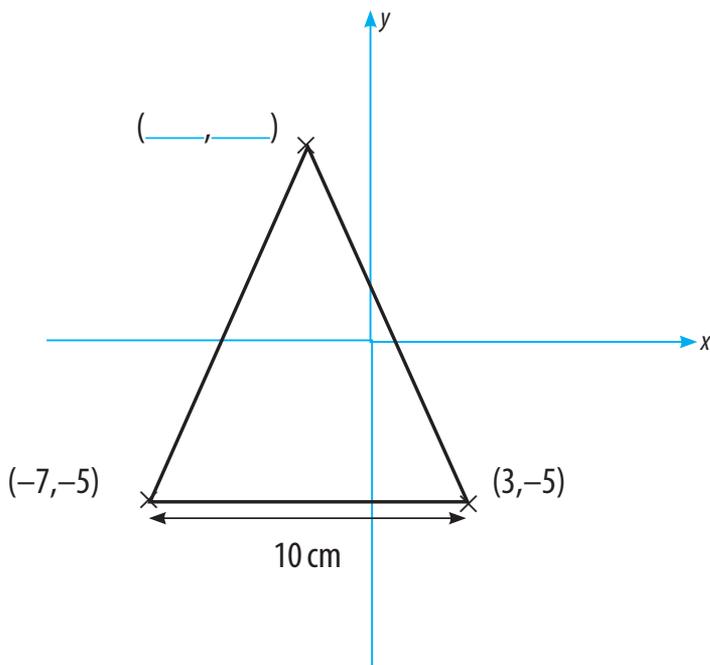

(1,-4) (-3,-3) (-5,4) (-4,4) (0,-6)

3
(1 mark)

/ 4

Total for this page

- 4 An isosceles triangle has a height of 11 cm.
Fill in the missing coordinates of the vertex.

4
(1 mark)

- 5 James plans to plot these coordinates and join them to make a square.

(5,4) (8,4) (9,0) (5,0)

Will these coordinates make a square?

Circle your answer. YES / NO

Explain your answer.

5
(1 mark)

6
(1 mark)

- 6 Gwen plots the 3 times table on a grid using coordinates.

Complete the pattern of coordinates:

(0,0), (1,3), (2,6), (3,9), , , (5,15), , ,

Top tip

- Remember that you can draw on diagrams to help you.

/3

Total for this page

Tables

To achieve the higher score, you need to:
 ★ complete missing data in **tables** using problem-solving skills.

1 This table shows how much money the children save.

	Sally	Ashott	Sam	Paulo
Money saved	£7.75	£10.99	£9.20	£11.49

Tick (✓) the statements that are **true**.

Sam needs to save 20% more to have the same amount as Ashott.

Sally has saved just over 75% of £10

The difference between the amounts saved by two children is $\frac{5}{10}$ of a pound (£).

1
(1 mark)

2 During Book Week, the children in a school compare their favourite types of books.

	Story books	Information books	Picture books	Total
Boys	$\frac{3}{8}$		25%	128
Girls		49	15%	120

a) Complete the missing information in the table.

b) What fraction of the whole school does **not** choose story books?

2a
(1 mark)

2b
(1 mark)

3 This table shows the money a town spends on repairs each year.

	Building repairs	Parks	Road repairs
2015	£23,300		£18,273
2016	£27,308	£19,826	
2017		£23,785	£36,208
TOTAL	£70,000		£83,460

The total amount spent on parks is $\frac{4}{5}$ of the money spent on buildings.

Complete the missing information in the table.

3
(2 marks)
